MARK ARTHUR SALVADOR

Full-Stack Developer

salvadorarthur24@gmail.com
Philippines (remote)

OVERVIEW

Full-stack developer with 7+ years of experience building web applications, SaaS products and AI chatbots. At HighThrive I ship production features across Next.js, React, Vue and Nuxt, Supabase, NestJS and Electron, and build the AI, GoHighLevel and automation work behind the company's products. Strong front-end roots, with a focus on fast, accessible and well-tested software.

EXPERIENCE

HighThrive.io

05/2026 - Present

Full-Stack Developer

- Build and run HighThrive.ai, a multi-tenant AI sales assistant that answers clients' Instagram, Messenger, WhatsApp, Telegram and TikTok DMs through ManyChat (Next.js, TypeScript, Supabase, OpenAI, Stripe).
- Engineered its reply pipeline: fast webhook acknowledgment with background AI work, a burst debounce that merges rapid messages into one reply, photo, voice note and document understanding, rolling conversation memory, and a prompt-injection shield red-teamed with 100 attacks.
- Built HighThrive Talents (talents.highthrive.io) end to end: job posting, applicant tracking, real-time chat, team roles, Stripe plans and an admin console on Next.js 16 and Supabase, with row-level security tests for every role.
- Ship features and desktop releases for Delegent, a time-tracking product (Next.js, NestJS, Prisma, Electron): raised mobile Lighthouse performance from 74 to 97 with SEO at 100, cut page weight from 1.78 MB to 0.43 MB, reworked productivity scoring and fixed Stripe billing sync.
- Rebuilt a real-time sales KPI dashboard in React (dashboard.stallionly.com; Supabase Auth, Realtime and Edge Functions): five departments plus an executive view, a weighted KPI engine that matches the team's spreadsheet, and an admin console.
- Built the Ledger affiliate portal (affiliate.launchstone.com; Next.js, Supabase): affiliate links and lead tracking, e-signed onboarding with encrypted tax and bank details, payout requests and XLSX/PDF reports.
- Build in GoHighLevel: funnels, booking and onboarding pages with custom HTML, CSS and JavaScript code blocks, calendars, forms and workflows, plus lead capture from the company's apps into GHL.
- Automated reporting and outreach: Slack reports from Google Sheets (Python, FastAPI, Playwright, GitHub Actions), live sales alerts and a paced messaging system for Skool communities.
- Turn client questionnaires into bilingual English and Spanish chatbot knowledge bases, and audit them for accuracy and compliance.

Homebuyer Wallet

03/2024 - 05/2026

Front End Developer

- Developed front-end features for the Homebuyer Wizard and Professional Dashboard (Nuxt 3, Vue 3, Nuxt UI, Tailwind CSS, Pinia), apps that match homebuyers with 2,000+ assistance programs and approved lenders.
- Translated design mockups and wireframes into responsive, interactive web pages using HTML, CSS and JavaScript.
- Ensured a seamless and intuitive experience across devices and browsers by following best practices and high accessibility standards.
- Worked closely with UX/UI designers, backend developers and other team members to integrate front-end elements with server-side logic.

Batchi Solutions 03/2023 - 03/2024

Front End Developer

- Developed and maintained e-commerce websites based on client needs using Vue.js.
- Provided technical support to clients and recommended solutions to improve the user experience.

Yondu Inc. 02/2020 - 09/2021

Junior Software Engineer

- Full-stack developer responsible for end-to-end web app development.
- Provided technical support to customers and clients.
- Created Web APIs used to communicate between different systems through Microsoft Dynamics 365.
- Worked with the team to improve the user experience across all web apps and sites.

Illimitado Inc. 09/2017 - 02/2020

Junior Software Engineer

- Full-stack developer responsible for end-to-end web app development.
- Built a Human Resource Management System (C#, ASP.NET Web Forms, ASP.NET Web API, Bootstrap, jQuery).
- Collaborated with the design team when designing new features of the system.
- Collaborated with the database administrator when designing new tables.

PROJECTS

HighThrive.ai: AI sales assistant that answers business DMs on five channels. *Next.js, Supabase, OpenAI, ManyChat, Stripe*

HighThrive Talents: hiring marketplace for companies and remote talent. *Next.js 16, Supabase, Stripe, Playwright*

Delegent: time tracking and screenshot monitoring for remote teams (contributor). *Next.js, NestJS, Prisma, Electron*

Homebuyer Wallet: marketing site, Homebuyer Wizard and Professional Dashboard. *Nuxt 3, Vue 3, Tailwind CSS, Pinia*

Sales KPI dashboard: live leaderboards, KPI scoring and forecasting for sales teams. *React 19, Vite, TypeScript, Supabase*

Ledger affiliate portal: affiliate tracking, partner onboarding and payouts. *Next.js 15, Supabase, pdf-lib*

Evan AI chat: streaming funding-advice AI chat and Slack bot with an evaluation set and leak checks. *Next.js 16, OpenAI, Upstash*

Community messaging system: Skool member sync with paced, sequenced DMs and a web console. *Node.js, TypeScript, Supabase, GitHub Actions*

EDUCATION

Cavite State University - Imus Campus (Cavite Civic Center) 2013 - 2017

Bachelor of Science in Information Technology

SKILLS

Languages: JavaScript, TypeScript, Python, C#, PHP, SQL
